AVARU

Katrina Affleck
CEO
katrina@avaru.io
(+34) 622 481 132

AVARU is a Spanish digital therapeutics company using an adaptive AI system across VR, web, and mobile. Its personalized sessions reduce pain, stress, and anxiety while promoting physical recovery. Operating in health, training, and corporate sectors, its core mission is to humanize healthcare.

EVIDENCIA

Thomas Gandolfi / Ana Castaño
Co-CEO & Co-Founder
thomas@evidencia.legal
(+34) 666 749 872

Evidencia is an AI dispute resolution platform connecting families and lawyers, starting with family law. It simplifies case management and boosts lawyer efficiency through automated tools. The system streamlines processes from negotiation to court-ready evidence, expanding into commercial disputes.

FENIRIA

Claudia Cuevas Rodriguez
CEO & Co-Founder
claudia@feniria.com
(+34) 628 044 034

Feniria optimizes GPU efficiency for AI companies to cut cloud costs without requiring code changes. It eliminates hidden hardware waste, allowing existing infrastructure to handle significantly larger workloads. A real-world test demonstrated a 9.4x capacity boost on the same GPU setup within two weeks.

FOXTERY

Art Maslow
Founder & CEO
art@foxtery.com
(+34) 611 052 604

Foxtery is an AI agent and LMS that turns company documents into interactive employee training, roleplays, and assessments. It automates course creation, translation, and tracking, integrating with ChatGPT and Claude via MCP. This drastically cuts manual work across learning, sales, and support teams.

INROOM

Josep Marsal
Co-Founder
j.marsal@inroom.io
(+34) 603 357 275

InRoom is a 24/7 automated WhatsApp platform for tourist accommodations that streamlines the guest journey, boosts revenue, and reduces reception workload–using a pay-per-check-in pricing model that scales with occupancy.

KEISHAL

Guillem López
Co-Founder
guillemlopez@keishal.com
(+34) 619 814 539

Keishal is an AI coworker for dental clinics that automates patient communications and reactivation. It integrates with existing software without staff retraining, filling empty chairs to recover lost revenue. Its performance-based pricing directly aligns with clinic growth.

KVASAR TECHNOLOGIES

Jordi Martí
CEO
info@jordimarti.tech
(+34) 610 627 199

KVASAR Technologies develops two core products: a Health Data Space Connector aligned with the European Health Data Space (EHDS), enabling secure and interoperable health data exchange, and Prometheus, a long-running AI research agent designed to autonomously conduct scientific research.

ONION

Axel Ruiz
Co-Founder
axel@onionos.io
(+34) 660 877 373

Onion is a B2B commercial operating system that combines software and hands-on SDR services to manage end-to-end sales operations, delivering a predictable pipeline integrated with existing tools.

PLAY YOUR BRAND

Xavier Bayle Miquel
CEO
xavi.bayle@playyourbrand.com
(+34) 649 541 564

Play Your Brand is a production-tech company that helps brands create audiovisual content faster and more cost-effectively through its AI-powered platform and scalable video production services. With offices in Barcelona, Madrid and Toronto, it streamlines workflows and reduces production costs.

TALIA

Albert Salmerón Cojo
CMO & Co-Founder
albert@talia.events
(+34) 681 075 801

Talia is the intelligent audience platform for live events. Every question, comment and booking becomes data the venue owns, powering marketing intelligence that connects audiences with campaigns and ticket sales. Our agents don't just answer: they act on each person's behalf, guiding them to purchase and making events accessible to everyone.

TECOUS

Víctor de Cubas
CEO
vdecubas@tecous.es
(+34) 639 848 815

This LegalTech company uses an AI design engine to turn complex contracts into clear, interactive visual experiences. It improves user comprehension and accessibility for institutions and businesses without altering original legal texts. This builds trust and reduces friction between organizations and their users.

VENTO.BUILD

Genís Frigola Camps
BDM
genis@protofy.xyz
(+34) 634 700 178

Vento is an AI-native platform that translates natural language descriptions into complete, hardware-agnostic systems –generating and connecting the necessary firmware, UI, cloud logic, AI agents, and physical hardware to accelerate deployment from months to days.

VICO AHORRO

Javier Pérez
CEO
administracion@vicoahorro.com
(+34) 653 278 858

VICO Ahorro continuously optimizes utility, telecom, and insurance costs for Spanish clients using its AI engine, LIA. The platform automatically detects savings and handles all paperwork completely free of charge. It has already saved over €53 million across more than 10,000 customers.

VIRTUABROKER

Daniel García Pérez
CEO
daniel@virtuabroker.com
(+34) 619 491 650

VirtuaBroker provides cross-border payment infrastructure for international businesses to manage multi-currency payouts, collections, and FX via local rails. It bypasses intermediaries to reduce costs, delays, and operational complexity. The platform streamlines global treasury management and reconciliation on a single system.

WABILON

Roger Bayés
Co-Founder
roger@wabilon.com
(+34) 680 524 212

Wabilon automates building compliance checks against regional codes and local zoning plans within an hour. It provides detailed legal reports for architects while enabling city councils to approve permits faster. By reducing licensing delays, the platform helps start construction projects sooner.

WEB2WAVE

Igor Lyubimov
Founder & CEO
igor@web2wave.com
(+34) 637 034 743

web2wave is a no-code platform that builds web2app quiz funnels to convert users into subscribers before they install an app. It lowers App Store fees, improves campaign attribution, and boosts conversions through built-in paywall builders, A/B testing, email marketing, and AI localization.

WILDEBIT

Daniel Ferrer
CEO
daniel@wildebit.com
(+34) 690 919 052

Wildebit transforms businesses with AI & Security through intelligent automation, knowledge and security services.

ZOUNDREAM S.L.

Roberto Iannone
CEO & Co-Founder
roberto.iannone@zoundream.com
(+41) 79 139 08 21

Zoundream interprets and translates infant cries into acoustic biomarkers, offering parents real-time insights into baby needs and providing clinicians with a non-invasive tool for early detection of neurodevelopmental conditions.
