Compressed air installation (double compressor) and electrical lines of 230V (monophasic) and 380V (triphasic)

Two mechanical presses of 55t, one of 75t and one of 130t. (Which are capable to work in automatic mode)

Two round bending and trimmer cutting machines.

Spot & nut welding machine (capacitor discharge type)

Semi-automatic threaded machines with possibility of double head and robotic arm.

Small support machines: table drills, riveters, ...

Automatic machine for testing electrical quality and safety.

Effectiveness ground wire (EGW), insulation, and dielectric strength up to 4000V and leak current control.

Angular welding machine and head tunnel for retractile packaging.
