Catalan Exhibitors
Mobile World Congress 2018
Catalan Exhibitors
Mobile World Congress 2018
Catalonia has always had a strong industrial sector, which has today become an eager mobile industry client: ICT, business solutions, retail and smart cities represent the sectors with which mobile companies more frequently work. Other important sectors include transport, health and public services. ICT is also closely related to activity in Smart Cities, the Internet of Things, m-health, gaming, e-commerce, all of which are highly active sectors in Catalonia.

From 2012 to 2023 Barcelona will be the Mobile World Capital. This means that not only the international flagship mobile event will be held yearly here, the GSMA Mobile World Congress, but a whole range of activities and programmes all year around will create a dynamic professional ecosystem for the mobile and its satellite industries. This initiative has transformed Barcelona into the permanent global centre for mobile technologies, has involved the development of a business environment focused on this type of industry on an international level and has made Barcelona a global benchmark for mobile transformation.

New sectors like e-commerce or digital gaming are growing thanks to its business advantages and to the projects taking place in Barcelona as a result of the city being Mobile World Capital. One of the biggest pools of skilled workforce in Europe and the appeal of the city as a place to live and work have also progressively consolidated a hub of talent and opportunities on a European level.

How can your company take advantage of this dynamic environment?

Many public-private projects are channeled through the Mobile World Capital Foundation. The capital also provides different opportunities for start-up initiatives as a hub (space for companies): privileged contact with key operators, networking opportunities, awards, among many others.

Companies
ACCENT SYSTEMS is a global provider of innovative enterprise IOT solutions. Our customers give us the idea and we turn it into a reality. Our main business is the wireless device market and we are experts in developing solutions from product development to mass production, in our IOT Factory (Barcelona).

We have wide expertise with IOT technologies like Bluetooth, WiFi, 4G/LTE, SigFOX, LoraWAN… and we are leading the industry providing NB-IOT solutions. We believe in the importance of R&D and our company is constantly investigating in new technologies that will help us to provide the best solutions for our customer’s needs.

Beacons are another of our business lines. Since this technology burst into market we are one of the iBeacon and Eddystone manufacturers leaders in the world.

ADSMURAI offers a unique solution with a Cross-Network Marketing Platform addressed to organizations looking for efficiently scale their social media advertising execution.

We uniquely address the planning and content sourcing problems, in addition to providing a great solution for automation and optimization (badged Facebook & Instagram Partners, Google Partners and Twitter API Access).

With our latest developed Content Sourcing & Visual Marketing application, Visual Commerce Platform, we are capable to find the most relevant user-generated content (UGC) for our brands between millions of images published in social media.
AIRK is a Spanish technology company headquartered in Barcelona. It manufactures the most versatile professional unmanned aerial vehicles (UAV), also known as drones. AIRK is specialized in customizing drones according to the user needs, designing and creating 3D printed free accessories. AIRK FireClouds is their first line up of Multicopter drones.

Alma is a Spanish software company specialized in the development and commercialization of advanced viewers for medical imaging. These viewers include last generation tools for diagnostic and surgical planning.

Ateknea Solutions is a leading European engineering company with extensive experience in helping small and medium-sized enterprises (SMEs) to transform their innovation projects into valuable, profitable and feasible market solutions. Ateknea provides a range of technical services including electronic (HW&FW), software development (Web & Apps, AI including machine learning techniques and deep learning for computer vision), mechanical design and automation in industrial processes.

Now our goal is to commercialize proprietary technology that is environmentally friendly, providing products that contribute to a better quality of life. Also, our own project Bettair provides cities with a cutting-edge IoT platform that allows them to map air pollution on a previously unimaginable scale, using a large-scale deployment of highly accurate sensors by means of an advanced post-processing algorithm.
Barcelona Technology School helps people from all over the world to develop skills ready to shape the digital future.

BTS prepares also companies to adopt digital transformation, helping them to understand the impact of digital disruptions, shifting to digital organization models and engaging talent with an own digital culture.

BTS ensures top training and education programs through partnerships with best ranked universities, leading digital labs, international Team of digital leaders and teachers with experience in global tech companies.

Programs: Big Data, Fintech, HR tech, digital healthcare, connected transport, legalttech, UX, software craftsmanship, innovation and cybersecurity.

BonaDrone is aimed to offer an educational tool to give teachers a resource to engage pupils in developing their technical or STEM skills (Science, Technology, Engineering and Maths) through 3D printed robots.

A central part of the process is empowering teachers. Many educators lack the practical skills and resources to teach students about technologies such as 3D printing, electronics and coding. BonaDrone is attempting to bridge this gap with an all-in-one package.

BonaDrone has several trials under way in Barcelona with public/private schools and the Polytechnic University of Catalonia.
The Computer Vision Centre (CVC) is a non-profit institution located in Barcelona.

We are leaders in research and technology transfer in the area of computer vision. Founded in 1995, the centre counts with more than two decades of experience in a wide range of computer vision applications and technological development that can be organised in four main areas:

- Culture & Reading systems
- Intelligent Mobility and transportation
- Personalized medicine and wellbeing
- Industry 4.0.

CTTC is a non-profit R&D center established by the Government of Catalonia. Fundamental, applied research, and technology transfer activities focus on communication technologies, infrastructure and services, and geomatics. The CTTC offers an extensive portfolio of:
- research and innovation services (incl. contracts, technology alliances, standards support, feasibility studies, license agreements, training)
- experimental platforms
- products and solutions

The Center has an outstanding record track of participation in publicly funded R&D programs (H2020) and contracts with the industry (e.g., vendors, operators, utilities).
Cleardrone’s mission is to harness the intelligence of flying robotics to reduce the costs and risks of large area O&M activities, like inspection and cleaning of solar farms and buildings. Initial product development is focused on a fully automated inspection and cleaning system for the fast-growing solar power industry.

Cleardrone was spun-out from a Barcelona-based technology incubator in September 2015 and first sales were generated by the end of 2016. We are currently already marketing our Sherlock intelligent inspection system, including our own drone and planning and post-processing software.

GO!Fleet is a smart mobility management platform offering a unique interaction between the backend and the mobile app. Customise the routing algorithm by choosing among the more than 10 features offered which plans optimal routes. Dispatch the daily roadmap to delivery drivers with the touch of a click. Drivers can update the status of each delivery with their smartphones, enabling customers to know the estimated time of arrival. GO!Fleet creates a cloud ecosystem where every user benefits of real time information at all times.

GO!Fleet brings value by:
- Reducing costs
- Automatizing tasks
- Providing reports
- Creating a communication network between all the users: clients, drivers and the back office
- Reducing the impact of incidents by taking care of the end customers.

Conecta Wireless is a telecom operator and IS/IT solutions provider for businesses and corporations with over 15 years of experience. It owns communications infrastructure connecting customers across America, Europe and Asia.

Our portfolio comprehends Connectivity, Cloud, Mobile Unified Communications (Voice, Video and Data) and Professional Services.

The leverage on our core strengths such as our proprietary VoiceGen® solutions, a unique business focus and our purchasing synergies as wholesale operator, define Conecta Wireless as a flexible Business Partner with a global vision for local action who masters technology, approaches consultatively and communicates in business terms.

Connectivity is a young operator with a different philosophy based on customer service. We offer unlimited connectivity services, having thousands of active users around the world.

We are specialised in IoT projects. You can have your own brand/logo printed on your SIM cards and as the provider name on the screen of your devices.

The qualities that define Connectivity are competitive prices with the best service and no minimum period contracts. Connectivity offers as well other connectivity solutions (VoIP, International Calls, Global Numbering, BYOD) and a special follow-up supporting any eventuality that arises.
DataLong16 is an innovative supply chain and asset visibility company offering solutions addressing a broad portfolio of challenges. We help develop great experience for clients, where they can stay connected with their assets in real-time. Our solution, which is connected to the “Internet of Things”, is serving several vertical industries, such as; pharma, agri-food, medical, chemical, laboratories, transportation, ... All of them strongly related to logistics and distribution.

PASSIVE OPTICAL LAN (POL) uses fiber-optic cable instead of legacy copper. Fiber-optic delivers broadband services to millions of users worldwide and it outperforms legacy LAN:

- Simplicity: Reduce complexity with just one multiservice network, while legacy networks need multiple networks
- Capacity. From 2.5Gbps downstream / 1.2 Gbps upstream in each fiber (GPON), to symmetrical 10Gbps (XGSPON) and 40Gbps (TWDM-PON)
- Lower total cost of ownership: Upfront CAPEX savings, reduced equipment footprint, lower power consumption, cheaper maintenance and lower OPEX
- Reach: Fiber reach up to 20km vs the limited 100m for copper
- Future-proof: +50 years lifespan and low-cost evolution (fiber and passive infrastructure reused).

E-STRATOS is born, the materialization of a project that wants to respond to the lack of practical tools to integrate the large amount of data of diverse origin that are used in environment and related fields such as territorial, forestry, agricultural or energy management.

The company is developing a platform capable of obtaining and analyzing information from as diverse sources as field sensors, productive yields, real-time meteorology, local weather forecasts, historical data of all kinds and maps generated from satellites, light aircraft and UAV’s. By transforming this large amount of information into layers of completely geolocated variables that are easily interpretable and useful for decision making.

Fraktal5 unifies in a single platform the advantages of social trading and the best tools to manage and monitor investments in the stock market. Fraktal5 offers the possibility of consulting all types of quotes, managing your stock portfolio, being informed in real time, tracking your investments, knowing the opinions of the rest of users in the community and sharing your own impressions with them, as well as following and emulating other users’ portfolio, etc.

Thanks to a friendly interface and its machine learning system, the application offers to the user new investment opportunities and reports everything that is happening in the financial markets in an agile and effective way.

Fraktal5: learn, share, win.

FlyAway Services is one of the main distributors of drones in Spain. With experience in the sector since its creation, we advise our clients on how to implement this new technology in their productive processes. Large firms trust our services, both public and private. We advise companies and organizations from areas as diverse as construction, engineering, geology, cinematography or defense and security.

Our new challenge for the future is to join drones and augmented reality. Always at the technological forefront, we look for more innovative and productive applications every day, generating a great value.

The i2CAT Foundation is a non-profit research and technology centre that promotes R&D activities in the fields of the Internet and advanced digital technologies. It has pioneered an innovation model based on collaboration between companies, public administrations, academia and users. i2CAT was born to revolutionize the future, from industry to end-user. 15 years of international research define our expertise. Among other, the centre provides telecom solutions in:

- The Network: SDN, NFV, Small Cells, 5G, IoT, Multi-Edge Computing
- Content & Media: New formats of virtual immersive content creation & delivery
- Digital Consumer: High precision 3D indoor positioning

Eurecat is the Technology Centre of Catalonia focused on: applied R&D, highly specialized training, consulting, product and service development and promotion of technological innovation. Some of our latest technologies:

- Analytics and Big Data architectures for geospatial datasets, social media, user profiling and context based recommendation.
- Indoor positioning.
- Quality control for Smartphones applications.
- Authentication systems (biometric recognition).
- 3D immersive binaural sound.
- 3D reconstruction from mobile photographs.

In the field of drones:
- Applied-research, mainly navigation, control, vision and perception and heterogeneous multi-robot systems.

ForceManager is the first Sales Accelerator Platform built specifically thinking of mobility and provides both field sales reps and managers with a solution that increases sales from day one. In order to improve results and increase sales activity, the system offers a native, multi-platform application that tracks and provides contextual information when on the move.

ForceManager works hard to maintain its tradition of using the latest, most up-to-date technology to ensure sales activity remains as efficient as possible. The company also boasts a significant international presence, with offices in London, New York, Barcelona, Madrid, Bogota and Mexico City and clients in over 30 countries.

Gave Electro is a low voltage equipment manufacturer based near Barcelona since 1944. Now owned by the 3rd generation, around 40% of Gave turnover comes from export markets. Innovation is at its core and several gamechanging patents have made Gave the preferred brand of choice for Telcos and Towercos.

Gave proposes a unique solution based in its own Automatic Changeover Switches technology. This product range, with a record of 5000+ units deployed all around the World, ensures the safest and most reliable backup in BTS supply systems and Hybrid Power Systems.

<td><strong>GOTAKI</strong></td>
<td>Gotaki is a powerful tool to create your trips and travel with intelligence, is the perfect online advisor for the tourist market. Gotaki is the source of information online, where we show you everything you need in a city. Gotaki offers a fairly novel map system where the user can create their own routes through the cities without needing to know the address of the site and create routes of multiple sites in the same route and the map system calculates by car, bicycle and walking. We organize all the information that there is on the Internet about a site and we show it to the user within a profile.</td>
<td><strong>HERTA</strong></td>
<td>Herta is a world leader in the development of cutting edge facial recognition solutions. Based in Barcelona and with offices in Madrid, London and Los Angeles, the company offers fast, accurate, robust, end-customer oriented solutions for video surveillance, access control, and marketing requirements. International projects include safe-cities, airports, train and metro stations, prisons, banks, casinos, sports stadiums, shopping malls, military, police and forensic applications. Herta has partners in 50 countries and more than 150 certified integrators globally.</td>
<td>From Gums Up we’ve created “Smart Rewards”, a loyalty system for companies, based on the mobile and the digital products. It is a platform of rewards where the brand can reward its clients for their loyalty. In our system, the client accumulates some points that can be exchanged for thousands of gifts. These types of solutions have already worked in the market, but we are specialized on the digital products, offering to the clients the gifts they really want like apps, games, music... in an international level. To that end, we partner with the main online stores: Apple, GooglePlay, Amazon, Xbox, Nintendo &amp; Playstation.</td>

Perspectiva is a specialist company executing IoT and Industry 4.0 projects. We have more than 12 years experience accomplishing projects for our customers around the world. We have three main knowledge areas, Industrial Design and Mechanical development, Design and developer electronic solutions and technologies applications, and last Digital where we design UI&UX and develop Apps.

Perspectiva team is a professional group of people passionate about design connect products. The most important for us is to create better solutions for our customers and your markets.

Perspectiva was born in Barcelona in 2005, with 4 people. Currently Perspectiva has more than 60 professionals with three offices, the headquarter is in a little town close to Barcelona, another in Madrid and the last in Sao Paulo (Brazil).
PROYECTOS DE GESTIÓN DEL CONOCIMIENTO’s mission is helping organizations to improve their performance by the developing and deploying their own Business Intelligence tools, from strategic and process consulting to report creation including KPI definition, Datamart design and ETL process.

We are manufacturers of the Atlas SBI Business Intelligence platform.

Atlas SBI is a BI and Big Data web platform one that make available to companies a traditionally complex and expensive technology in a easy and affordable way at anytime, anywhere for any mobile device and includes all BI tools in a single solution.

BI4Web is a scalable tool for data extraction since any origin (Big Data, DB Relational, Web services,...), analysis and publication of information on web at SaaS and on-premise model.

Allows to have a complete business intelligence solution, efficient, safe and intuitive.

Gives to company employees, the tool needed to manage decision making, resulting a flexible and dynamic company.

Restbai has created an efficient Artificial Intelligence platform to train customized Image Recognition models that solves and automatizes the particular image understanding requirements of each company with outstanding accuracy.

Our ultimate and awarded deep convolutional neural networks based APIs allow companies obtaining unique custom-built solution hassles.

We also offer several ready to use trained APIs:
- Real State and Properties (accuracy >98%).
- Prohibited products detection (drugs, chemicals, medicines, food, etc.).
- Logo and Watermark detection.

SafelaySecure Communications S.A. is a leading provider of security software for Public Key Infrastructure (PKI), Multi-Factor Authentication (Identity Federation, Adaptive Authentication, SSO, Mobile ID), Electronic and Cloud Signature, Data Encryption and protection of Electronic Transactions.

SafelaySecure’s eID technologies protect, serve and make use of the digital identity of people (corporate users or citizens), as well as connected objects (software systems or hardware devices), contributing to building trust in today’s digital era.
Sapenta is a simple, social and smart end-to-end smartworking platform for the Digital Enterprise. We increase employee engagement, collaboration, and productivity, while delivering flexible, agile and data-driven working practices via our automated and fully connected platform of tools for managing Projects, Tasks, Resources, Teams, Time, Purchases, Travel & Expenses, communication, and reporting. No more silos, paper-based, manual or fragmented processes. In response to a highly fragmented technology landscape of single function workplace tools and apps, we built the Sapenta smartworking platform to ensure everything is ‘all-in-one’, in sync, easy to navigate and instantly accessible. One Workplace, One Platform, One Experience.

SEGUCOM is specialized in developing technology to create trusted electronic objects and their corresponding trust archives. You can apply our technology to provide trust to a picture taken on a mobile device or to a message for traffic lights control or to audit and archive actions generated by external systems, IoT...

Selftising is focused on behaviour management applications.
Sensefields Advanced Mobility Data Technology, designed to meet the latest needs of the mobility landscape worldwide, offers sophisticated solutions for intelligent infrastructure and vehicle applications, as well as, for the next generation mobility communication systems. Based on the IoT and focused on R&D innovation results tested in the most demanding industry environments, Sensefields is developing its portfolio by resolving complex traffic management problems.

Taking advantage of the expertise in the traffic management industry, Sensefields is now revolutionising the Connected Vehicle field by offering advanced telematics services combining established geolocation applications with sophisticated local data processing solutions.

Sensing Tex is a young company headquartered in Barcelona with large international commercial presence around the Globe. It is specialized in developing end to end solutions based on its own Sensing Mat platform for sectors such as Sports, Wellness and Healthcare.

Sensing Tex offers innovative solutions and support to guide our customers from the early stage to the manufacturing of integrated finished products combining Sensing Mats with the cutting-edge electronic and IT technologies.

Sensing Mat Platform by Sensing Tex is based on patented technology developed by the Sensing Tex team and has been deployed in hundreds of commercial projects for different applications in B2B and mass market.

Serimag provides Artificial Intelligence-based solutions using Machine Learning, Computer Vision and Natural Language Processing techniques for document process automation.

Our customised solutions, TAAD for massive processing and SMAAT for mobile devices (App & SDK), allow our customers to perform Intelligent Document Recognition.

The key to our success is based on efficient implementation, accurate results and adaptability to the specific features of each process and client, all made possible due to our consultative approach to each project.

At Shoulderpod we design and craft professional Smartphone equipment for using smartphones as cameras. We create high quality tools for photographers, filmmakers, journalists, and travellers who are already using their smartphones for telling wonderful visual stories and sharing them with the world.

Our first product was the Shoulderpod S1 launched in MWC 2015 and since then our brand has become a reference for mobile journalism worldwide. At MWC 2018 we will reinforce our modular concept for allowing a personal configuration of our rigs for mobile reporting and videomaking.

UC is created to build dialog between staff and foreign customer. We focus on the correct translation.

Your company decides what phrases should be introduced to the dialog of your sales protocol. All audios are recorded by native speakers. Prebuilt guided dialog with features like cross selling and no errors of translation will increase sales of the company to the foreign customers.

As an evolution of our service we are also dedicated to the creation of chatbots. Thanks to the great experience in the implementation of dialogues in different languages we can ensure accurate interaction between the client and the establishment through different chat platforms (Facebook Messenger, Telegram, etc.).
Versa Design is specialized in electronic product development and manufacturing for IoT and mobile phone enabled devices. We provide a turnkey solution for connecting devices to Internet, covering from engineering phase to manufacturing. We have a vast experience in WiFi, Ethernet and Bluetooth and we can provide a cost optimized design that we can manufacture in mass production in our facilities. We develop firmware and software according to the requirements of the product. We also have experience in obtaining CE and FCC certifications (EMC and electrical safety compliance) for industrial, consumer and medical products in mass production in our ISO9001 certified facilities.

Wavecontrol is an ISO 9001 and ISO 17025 certified engineering company with over 20 years’ experience and headquarters in Europe (Barcelona, Spain) and the USA (Rutherford, NJ). We design and develop professional instruments for measurement, monitoring and evaluation of human exposure to electromagnetic fields. We are proud to introduce our WaveMon personal monitor for the protection of telecom workers against EMF. We also designed the most versatile and successful hand-held unit on the market, SMP2, for the certification of telecom infrastructure. Last but not least is our continuous monitoring system, MoniTEM, in outdoor and indoor versions.

Wise Security is a leading cybersecurity company. Our key audit solution, Drydor, has been developed to provide highly efficient App audits, thanks to its innovative engine, combining: automated, IA and human review. Drydor tool is able to maximize vulnerabilities detection while cutting costs. Wise Security also provides key guidance and monitoring over global cybersecurity. Our CISOaaS (CISO as a service) allows outsourcing cybersecurity services breaking down complexity, simplifying procedures and speeding up implantation process. Thanks to our CERT, and multiple entities collaboration, we are able to correlate incidents faster.
4YFN, the leading startup platform in the entrepreneurship and digital innovation field promoted by Mobile World Capital and the GSMA, presents its 5th edition of its most international event, 4YFN Barcelona 2018, which will take place within the framework of the GSMA Mobile World Congress between 26-28 February at Pavilion 8 in the Fira de Barcelona at Montjuïc. It will gather local and international entrepreneurs, startups and professionals working at large corporations in order to create and launch new tech-based businesses.

4YFN Barcelona 2018 expects to attract over 19,000 visitors in an event that will see the participation of 600 investors. Additionally, the exhibition area - the Innovation Market - will welcome more than 600 startups from 145 countries and 12 international delegations from Belgium, Colombia, France, Germany, Israel, Italy, Japan, South Korea, Spain, Sri Lanka, Taiwan and the United Kingdom.

The event programme also includes a total of 110 hours of content on blockchain, IoT, tech transfer, corporate venturing and artificial intelligence, among other items. These sessions will be chaired by 275 leading international speakers.

On the 1st March, entrepreneurs will have access to the Gran Via congress area so they can take part in the final day of the MWC.

It is aimed at an international public, made up of start-ups, investors and executives from large companies attending the MWC.

The Government of Catalonia is present in the 4YFN with 33 Catalan companies. With this activity, Catalonia positions itself as one of Europe’s most recognised, dynamic and promising start-up ecosystems.

Consult the programme here: www.4yfn.com
Acqustic is an online platform that allows you to order live concerts from great musicians in just a few clicks. Thanks to Acqustic you may have live concerts in a: Living room / Garden / Rooftop. Acqustic also organizes secret concerts anywhere and creates great music experiences for brands and corporations.

AEInnova is specialized in integrating energy harvesting solutions in the industry 4.0. Thanks to this patented technology, we improve the energy efficiency of the industrial processes and power our batteryless maintenance free NB-IOT devices.

BioInnove® is a biotech company that offers to the market the necessary service to improve your health and wellness through the knowledge of your DNA and your habits. Our own algorithms are based on scientific studies. So we are able to shorten the distance between science and preventive/predictive medicine with the final user. Everything is automated by our computational systems.

Those systems will help the user to reduce their weight, improve their sport capacity or improve the efficiency of their cosmetics or anti-aging treatments.

BioInnove has the clear mission of democratizing the use of preventive and predictive genetics.

Boxmotions is a physical storage solution in the cloud both for individuals and businesses. It includes on-demand transport, and everything is managed online.

The disruption comes from the application of tech innovation and optimised logistics to change the traditional self-storage business model. It generates more value to its customers whilst maintaining prices 5-25% cheaper, thanks to storage cost reduction and reduced need of finance.

Boxmotions operations started in Barcelona in May 2016 and the product is completely developed and validated in the market.

DefyU is the first free-to-play platform that merges fantasy sports with gaming and social elements, shifting 180 degrees from the current gambling model.

Diet Creator is a powerful nutrition software solution that simplifies the work of nutrition professionals (nutritionists, doctors and personal trainers) as well as food industry professionals (caterers, food sellers and manufacturers). Our program allows for the analysis of the complex relationship between nutritional needs and preferences of users/patients. The system enable synchronization and information management with smart scales, smartphones, wearables, robots and nutrition label printers.

Dinbeat is a StartUp company which has developed a wearable device that tracks pet’s vitals: Electrocardiogram (ECG), breath per minute, heart rate, temperature, activity, and bark. The first version is for dogs and for professional use, mainly for veterinarians. We will also develop another version for domestic use in the second phase of the project.

We are looking for investors and partners to join this journey with us. If you’re interested in our project, please come and visit us at our stand.

Epinium empowers brands and manufacturers providing them a comprehensive SaaS platform for Amazon analytics to make their products shine on the digital shelf and to increase global sales. Amazon is the world’s leading marketplace, but just a few sellers know how to optimize the performance of their products.
eStreams is a platform of leisure and entertainment in the video game sector, specializing in electronic sports, offering these services through the construction of interactive communities. We index all streaming content and help convert passive content into active.

We do it through 3 tools that help improve the engagement and the conversion of the community.

DNA FAMILY BOOK service (collection/preservation of family's DNA at client's home and in Biobank, and Genetic Counselling) solves the problem detected by the CEO: DNA of families with several cases of the same pathology (above 50% of the current population) is not available when the new biomedical findings (eg new genes, epigenetics, ...) would need to test it, now or in the future, to provide prevention, cure or effective treatment.

DNA FAMILY BOOK is acquired for health, but also emotional reasons. The service is committed to families affected by hereditary pathologies, but also families looking for emotional relief. DNA is treated to be kept at home at room temperature, as an unvaluable keepsake with the person's purest essence.

FLYSHIONISTA is the first social delivery network for fashion and style.
The Flyshionista mobile app connects style hunters and travelers all around the world. Thanks to Flyshionista the market barriers faced by e-shoppers can be overcome: users can purchase and receive style items which aren't available in their countries or earn money delivering such items on their travels. Flyshionista offers a unique, entertaining and profitable shopping experience.

GameBCN is the videogame specialist program in Southern Europe, which offers the necessary training and mentoring to make a successful launch to market.

GameBCN's goals for the videogame industry are:
- Create an entrepreneurship program that can serve as an European benchmark.
- Promote the creation and development of new companies with a global vision.
- Attract talent to develop their entrepreneurial activity in Barcelona and Catalonia.
- Generate benchmarks of international success in entrepreneurship.
IOMED

Aboutit, the comparison shopping site/app for a new generation of consumers, choosing products that are better for their health, that respect the environment and are socially responsible.

About

Content Generation SaaS for Newspapers and Bloggers around Movies & Series Content. A Freemium SaaS, isnotTV works with some of the bigest newspapers in Europe as well as bloggers, festival and content providers.

About

The future of independent bookstores is collaboration and teamwork and it is in this context that Libelista is born, by creating a common online environment that wants to visualize the essential prescriptive work of our booksellers, in addition, put at their disposal the best ecommerce tools.

About
MonkingMe is the first music platform for listening to and downloading music for free while the artists are paid. Thanks to free remunerated downloads (where an advertisement is displayed before the download), you can get the music for free and listen to it offline. With this model we monetize an action that until now has not been able to monetize, piracy.

In addition, by taking advantage of the visibility and virality of free content, artists can link concerts and sell merchandising through our shop to increase these income sources.

Playmoss is a music platform and community that allows users to create playlists combining music from different sources (YouTube, Spotify, Vimeo and more). On Playmoss, users can access a huge catalog of music playlists (165,000+), follow the activity of other music lovers, listen to their playlists and like them: users and their curated multi-source playlists are at the very heart of our platform.

Psonrie is the first online and anonymous service in Spain, focusing on early stages of mental illness.

Users can talk to a psychologist right when they need to, at an affordable price and from any place.

Psonrie is a professional service with more than 150 experienced psychologists. Start now downloading our Android or iOS app.

TECHNOLOGY 4 FREEDOM believes that every person has the right to provide his/her full potential to the world. Unfortunately, more than 1 billion people who live with some disability or multiple medical pathologies can not do so. To solve this situation, we have created a small, customizable device with sensors, which connected to our Apps smartphone platform, provides solutions to his/her unique set of singular conditions.

We provide solutions to everyday life, such as creating safe play areas for a blind child, or monitor the elderly person vital constants to anticipate an arrhythmia or an epileptic crisis.
**Tviso**

Tviso is the new way to watch television. We allow the user to have absolute control over what they want to watch so they don’t waste their time searching through the thousands of titles available online.

We include all the content availability information from all the online platforms and personalise the content mix according to a user’s preferences.

Our platform allows you to easily access more than 200,000 movies, series and TV programmes from over 20 different sources.

---

**UnifyMe**

Cloud Unified communications as a service for international companies. Corporate chat, video meeting, IP telephony, SMS and integration with Salesforce.

---

**Watchity**

Watchity is the agile video production platform for social media and digital channels.

It helps media organizations to increase productivity and reduce costs in live and on-demand video production by using smartphone cameras and cloud editing tools, and increases the reach of the content by simultaneously distributing it to many destinations, including web, app and social networks.

Watchity allows the creation of professional content but also opens the possibility to capture user-generated live video to enrich video production with genuine content.

---

**UPF Starting Lab**

UPF Starting Lab is an incubation program promoted by UPF and coordinated by Canòdrom - Creative Research Park, with the support of Generalitat de Catalunya (ICEC).

Its objective is incubating Final Degree Projects (TFG) in Audiovisual Communication from UPF’s Interactive Communication specialty.

UPF Starting Lab incubator is part of a more global strategic axis driven by UPF and the Faculty of Communication, focused on the relationship and projection of its students with the business world and the cultural institutions of the city. It also pursues to create interdisciplinary projects and to generate entrepreneurship and collaboration dynamics among students, outside the framework of established studies.

---
Wideum Solutions offers solutions to industrial companies that manufacture or maintain machinery and equipment, in order to improve their technical after-sales service, with the avant-garde technology of augmented reality. We improve the efficiency of field technicians in diagnostics, repair and maintenance of machinery and facilities with remote assistance on smart glasses.

Our main product, Remote Eye®, is a solution based on smart glasses, smartphones and tablets that allows sharing information between field technicians and support departments. It enables effective remote support to users with complex tasks, providing real-time information from the remote scene. It reduces machine downtime, improves efficiency during commissioning of machinery and industrial facilities, reduces travels and increases the value of after-sales service.
Are you looking for new international partners? Are you looking for new cooperation opportunities? Do you want to commercialize your technology? Come talk to an expert from the Enterprise Europe Network.

Enterprise Europe Network (www.een.ec.europa.eu) is an international network of close to 600 partners from 62 countries with more than 3,000 local experts ready to help you find the right partners and grow your business through innovation.

Amongst other services, ACCIÓ, the Catalan Agency for Business Competitiveness, as a member of the network, organizes year after year at the Mobile World Congress a B2B matchmaking event (Brokerage Event).

The MWC Brokerage Event is for a great opportunity for:
- Identify potential international partners
- Meet targeted companies and decision-makers
- Complement your visit to the congress with a personalized schedule

The event has supported companies and institutions worldwide in creating opportunities and finding partners for international cooperation since 2006. Once again, we seek to exceed your expectations!

Last year’s edition...
- 1,715 meetings were held
- From 30 different countries
- In total, 410 participants joined the #MWCBrokerage

SmartCatalonia is the strategy of the Government of Catalonia that, in line with the Europe 2020 strategy of the European Commission, extends the Smart City concept on a national level to undertake a programme that integrates and coordinates local and multi-region initiatives in support of businesses and ongoing Smart initiatives throughout the territory.

SmartCatalonia aims to make Catalonia an international “Smart Country” of reference, using digital information and technology to bring innovation to public services, drive economic growth and promote a smarter, more sustainable and more inclusive society.

The SmartCatalonia strategy, coordinated by the Secretariat of Telecommunications, Cybersecurity and Digital Society of the Presidential Department with collaboration from all administrative departments and bodies of the Government of Catalonia, has structured its priorities around the following areas of action:
Catalonia Smart Drones is a joint initiative of the Government of Catalonia, the Catalan drone industry and research institutions aimed to promote smart services and solutions with drones, while invigorating the Catalan smart drone industry.

Catalonia Smart Drones has been established with more than 85 companies and entities which work within the group as driving forces behind the smart services and solutions sector with drones in Catalonia.

The primary aim of Catalonia Smart Drones is to boost the competitiveness of the Smart Drones industry as the driving force behind the Catalan economy, by promoting projects that foster the creation of employment and help position the Catalan Smart Drone industry on the global map.

The action plan to promote this industry is part of the Smart Catalonia strategy of the Government of Catalonia.
Acció is the agency set up by the Catalan Government to make Catalan enterprise more competitive throughout the world. Its key aims are to promote business growth, drive innovation, internationalisation and attract inward investment.

Acció functions:
- Developing business competitiveness
- Encouraging the internationalisation of Catalan firms, their expansion and consolidation
- Promoting Catalonia as a business-friendly location
- Encouraging R+D and business innovation, as well as technology transfer
- Fomenting the creation of technological and high-growth potential start-ups

To promote internationalisation and innovation, Acció counts on a network of 40 Trade and Investment Offices across the globe based at the main economic cities, operating in more than 110 markets. Our Trade and Investment Offices provide Catalan business qualified support, insight and advice in international trade and investment.

Trade and Investment Offices closely monitor market trends and analyse potential risks. Services provided are tailor-made depending on specific company needs and level of presence in chosen markets, from creating demand to giving support in productive investment and logistics:
- Market research
- Search for marketing channels: distributors, agents, customers, etc.
- Search for supply chains: suppliers, manufacturers, etc.
- Search for trade and technological strategic alliances
- Setting up: business location, legal and labour advice, partnership opportunities, etc...
- Trade missions
- Contact follow-ups and business networking
- Recruitment of qualified staff

Our offices also offer guidance to international firms on opportunities and inward investment to Catalonia.
If you need proof that Catalonia is business friendly, just look around you.

CataloniaConnects

Catalonia Trade & Investment is proud to welcome you to the MWC 2018.

With over 30 years’ experience in promoting, advising and assisting investment projects in Catalonia, we are your ideal partners for free, impartial and expert knowledge on local business opportunities, from large to small. See us at the Catalonia Stand or get in touch with us at your convenience.
