Qilimanjaro Quantum Tech

qilimanjaro.tech

Qilimanjaro is a full-stack quantum computing company based in Barcelona and founded in 2019 that aims at maximizing current technology capabilities to provide practical quantum advantage in a shorter time frame by following a unique strategy. We use the analog model of quantum computation, with high-quality superconducting flux qubits and versatile qubit-qubit interactions to build app-specific quantum devices (QASIC), in a co-design approach that brings the design of the quantum chip closer to the use-case. We offer an exclusive Quantum as a Service that allows for remote access to our distinctive quantum computing platforms and a boutique service for deployment and integration of in-premises quantum computers.

Workdeck

[Workdeck.com](https://workdeck.com)

Workdeck is an innovative software startup focusing on enterprise AI, building a SuperApp powered by our own Adaptive AI engine, distinct from typical Generative AI integrations. Our technology, based on a patented Multi Agent System framework, is designed to improve managerial planning and decision-making by processing the dynamic datasets of businesses in a secure, private environment. Since 2021, we've obtained a patent and developed our MVP with feedback from pilot clients, including notable universities and professional services firms. Our platform offers out of the box project management, task management, resource planning, leave, purchases, expense and travel management, document repositories and reporting suites in an 'all-in-one' hyper-connected and intuitive platform.
