MOBILE KNOWLEDGE

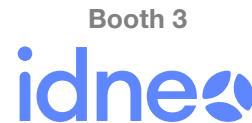

MobileKnowledge is a team of HW, SW and system engineers, experts in smart, connected and secure technologies for the Mobile, IoT and automotive ecosystems.

themobileknowledge.com

IDNEO

A company dedicated to technological development, validation and manufacturing services for customers around the world. Their multidisciplinary teams is highly specialized in automotive products, advanced technologies, MedTech, consumer electronics and industrial products.

MONOCROM

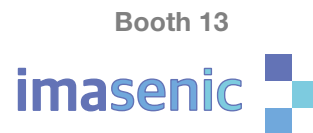

Monocrom operates in the semiconductor lasers sector with a patented solder free packaging technique for laser diodes that offers thermal and optical advantages. Technology proved for GaAs, GaSb and InP. Monocrom manufactures laser diode and diode pumped solid state laser modules and subsystems for medical, scientific, industrial and defense applications.

IMASENIC

IMASENIC develops custom CMOS image sensors and readout circuits (ROIC) for the visible and "invisible" spectrum (infrared, UV, X-rays, electrons, etc.) for worldwide customers in markets like IoT, automotive, industry, science, space and medicine. IMASENIC also develops custom mixed-signal analog-digital ASICs for these same applications.

imasenic.com

OPENCHIP

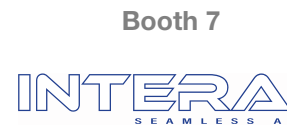

OpenChip is a semiconductors company aiming to perform tailored high performance and energy efficiency SoC based on RISC-V that will contribute to the European digital sovereignty.

openchip.com

INTERA

INTERA provides chip level design and development (ASICs, FPGAs and SoCs) plus embedded software in Industry 4.0, Smart Energy, Image recognition, Digital health, from initial stage to mass production. The company employs AI-driven chip design and use AI technologies such as machine learning to design, verify, and test semiconductor devices.

intera-group.com

QPLOX

High tech engineering company headquartered in Leuven and offices and research labs in Eindhoven and Barcelona. Spin-off from NXP semiconductors specialized around the design and integration of customized electronic instrumentation, test and characterization equipment, and integration into labs or assembly lines. Active in IoT, specially in the field of sensors.

Catalonia Semiconductors

QUALCOMM

A company dedicated to enabling a world where everyone and everything can be intelligently connected. Qualcomm scales the technologies that launched the mobile revolution to the next generation of connected smart devices (5G, smartphones, smart vehicles and cities, connected factories). 5G and AI innovations behind the connected intelligent edge.

SGS BRIGHTSIGHT

The largest independent security evaluation lab in the world. We support companies in getting their products ready and in compliance with the latest security regulations and requirements. Over 35 years of experience in evaluating IT products in different industries and these products against requirements set by governmental and private schemes.

TEF

We are an EMS (Electronic Manufacturing System) with over 40 years of experience in the electronics sector. We assist all our clients with their needs and processes, committing to quality, and embracing the turnkey project concept. This includes various processes such as Industrialization, SMD, THT, Testing, Mechanical Assembly, or Coating
