Towards a record ISE for Catalan companies

Catalonia has been consolidated over the last few years as one of the main poles of European technological fairs and congresses. The arrival of Integrated Systems Europe (ISE) in Barcelona in 2021, motivated by the technological nature of the city and its ecosystem of start-ups, reinforced this positioning.

Organised by the Audiovisual & Integrated Experience Association (AVIXA) and the Custom Electronics Design and Installation Association (CEDIA), ISE is Europe's most important audiovisual and integrated systems fair and has become a key asset to promote, even more, a very relevant sector in Catalonia.

Beyond the quantitative data, the Catalan ecosystem of the sector has a large representation of audiovisual production, communication and distribution companies. There are also related elements such as business associations and clusters, training entities, technology centres and research groups that provide differential solutions and generate talent for the sector.

Public institutions are also an important part of this ecosystem. That is why, once again, the Generalitat de Catalunya makes the Catalonia Pavilion available to companies and entities within the framework of the ISE, with the aim of further promoting Catalan audiovisual sector. It is an initiative that also aims to facilitate the search for investors, partners and customers and to open new international markets for the sector. This catalogue includes the 33 companies located in this pavilion, which participate with the support of ACCIÓ and, also, the Catalan Institute of Cultural Enterprises.

Additionally, ACCIÓ also organises networking meetings through the Open Innovation Challenge, the central B2B event of the congress. This space will allow start-ups, companies or technology providers to respond to challenges of companies and entities that seek to carry out projects related to the audio or video sector and other digital technologies.

We hope that this edition, which is expected to be a record-breaking one, will also be memorable in terms of objectives achieved and business generated for Catalan companies in the sector.
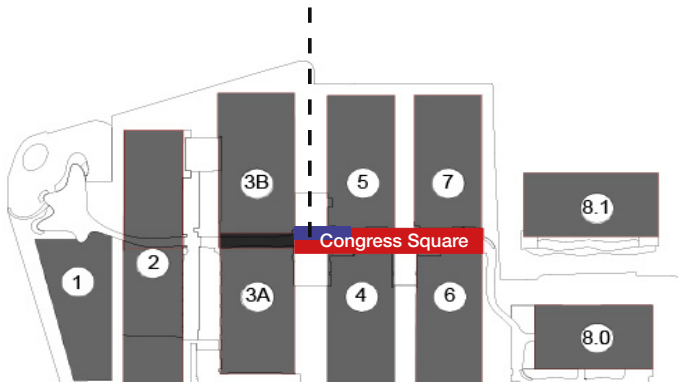

Jaume Baró i Torres
Secretary of Business and Competitiveness and CEO of ACCIÓ
